Public Speaking Honors Won By Travers Girl

Rita Watson, 13-year-old daughter of Mr. and Mrs. W. A. Watson of Travers won the Intermediate Provincial Public Speaking Trophy at Olds.

Tuesday evening the Women's Institute Girls' Club Convention was the scene of the competition. Rita chose as her topic, "Alberta at a Glance." Her three-minute talk depicted Alberta as one of Canada's leading tourist centres. In colorful phrases she described the majestic Rockies, the scenic prairies with their unforgettable sunsets, the parklands to the north, etc. She told of industry and agriculture and urged her listeners to make visitors feel at home so they'll want to come again.

Rita has competed for the past four years in Lethbridge, each time bringing home the trophy for Southern Alberta, or District 4 as it is called, taking in an area from Calgary to the International Boundary. Two years ago the class in Lethbridge was divided into junior and senior. Rita, although still a junior, entered in the senior both years and won.

Rita's younger sister, Terry Marie, now 11, entered the junior class both years and won each time. Terry competed for the provincial junior trophy at Olds last year but was unsuccessful. Rita competed three years ago at Olds and also lost at that time.

Elks Win Top Money At Champion Tourney

After absorbing a 17-6 shellacking by Champion at the local diamond on the previous Sunday, the Vulcan Elks journeyed to Champion last week for a two-day ball tournament and came away with top money of \$100.

The first game saw the Vulcan club dump Lomond 3-1 in one of the best games played. Lefty Al Warnick hurled for the local crew and gave up only one hit over the entire nine innings. Huff was just as tough as he allowed only five Vulcan hits.

Champion defeated Carmangay in another close game and this set the stage for the Elks win on Thursday.

Trailing one to nothing for six innings the Vulcan club exploded for seven runs off starter Sev Passoli and reliever Roger Jensen in the seventh, then added two more in the eighth.

Charlie Sjogren was the hurler for Vulcan as he held the usually hard hitting Champion team to only five hits. Key blows for Vulcan were a three-run double by Dave Mitchell and a pinch hit single by Al Warnick which drove in three more runs.

After winning the Champion tournament the locals played in Carmangay Sunday, where Rick Steadman and the Carmangay club shut out the Elks by a 2-0 count.

Al Warnick was the losing pitcher for the locals, who loaded the sacks three times but couldn't score. In all Steadman stranded 17 runners during the game.

Vulcan's Water Supply

We are glad to see the Vulcan town council is taking at least the preliminary steps to investigate the possibility of utilizing the airport well as a source of supply for town water.

The well, which served the airport in the war years when the strength of Air Force personnel stationed there was about equal to the present population of Vulcan, is a large (6-inch) well and the water was piped about five miles to the airport. According to local men who were stationed at the airport during the war, the water is of much better quality than Vulcan residents are now getting from the wells located inside the town limits.

Vulcan is growing steadily and the demand for water keeps increasing, particularly in the spring and summer months as new home owners plant and maintain lawns and shrubs. The Town must look ahead and be prepared to meet this growing demand and any effort to improve the quality of water at the same time would meet with the whole-hearted approval of the ratepayers.

The Town of Nanton found that drilled wells could not give it a satisfactory water supply and finally has to lay a pipeline from an ever-flowing spring several miles out. We think that Vulcan, too, will be forced to find an outside source of water. The airport well may be the answer and, if investigation finds that it would be satisfactory from the viewpoint of both quantity and quality of water, the somewhat heavy expense of laying a pipeline for four or five miles would be justified.

If the airport well is not satisfactory in either or both of these respects, we think that, like Nanton, the Town will have to look for a suitable spring as a pipeline source of water.

Efficient Farm Production

(From Rocky View News)

City newspaper writers seem unable to understand that the farmer's present grief comes from not too little efficiency, but from too much. Canadian farmers produce far more food per man hour than they did, say, ten years ago. Though their controllable costs have undoubtedly come down so have prices when measured by dollar-value. And unfortunately, their costs beyond their control have risen. The only way a reasonable profit can be made is by the increased efficiency of producing more and more at the smaller margin. And this, of course, builds up surpluses which bring down paying prices still further.

To say the farmers should be wise businessmen and should switch to another food product is tantamount to telling them to switch from one surplus position to another, which is, in fact, happening. Probably what these newspaper writers really mean is that farmers should switch out of farming altogether, but would that be good for Canada?

Electricity Is Safe

If you use common sense

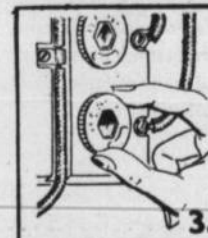

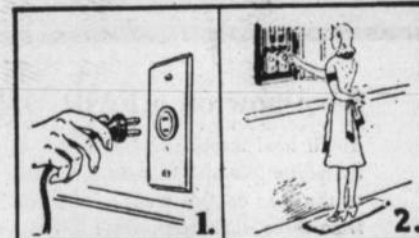

"Here is what may happen if you fail to use common sense."

COMMON SENSE RULES:

1. Employ a competent electrician to wire your home and farm buildings.
2. Use approved appliances, equipment and cords.
3. Never handle cords nor equipment with wet hands or while standing in wet places. Almost all places are wet enough to cause a ground for electricity. Wood and concrete floors have moisture in them.
4. Be familiar with directions for use of each piece of equipment—and operate it according to these directions.
5. Extension cords should not be run under rugs, over nails, nor around pipes or radiators, nor out-of-doors.
6. Always pull the plug—not the cord when disconnecting equipment.
7. Always replace a blown fuse with another of the same rating. Never use anything else as a substitute for a fuse.
8. Never touch exposed wires until you have turned off the power.
9. Call the nearest power office whenever your own service or the power line goes dead.
10. Always ground portable tools such as drills, hand saws, sanders, etc. before plugging in.
11. When moving tall machines or out-buildings, make certain there is ample room under all power lines.
12. Infra-red heat lamp installation should be of the best workmanship and material. Lamps should be suspended by chain or heavy wire, never by the cord. They should have heat resistant porcelain receptacles. Lamps should be protected from moisture and mechanical injury by a reflector top and hoop style guard underneath.

WHEN YOU CHANGE A FUSE

1. Locate and disconnect lamp or appliance responsible.
2. Locate blown fuse while standing on dry board.
3. Unscrew, being careful not to touch anything but fuse rim. Replace with new fuse of correct ampere rating.

Note: Use 15 ampere fuse for ordinary household or lighting circuits (No. 14 wire). 30 ampere fuse can be used with No. 12 wire.

Lightning apparently hit the phone at the Alex Henderson farm house and set a fire in the living room burning the furniture and causing considerable smoke and water damage. The fire engine lost no time getting there when the alarm was given. Without the engine the whole house would no doubt have been lost.

Walking across the floor she blacked out and in falling suffered a cut to the head that had to have stitches and two black eyes. We are happy to report that she is now much improved and back at her home again.

Bob Scott is the first to report harvesting operations this season. Bob started combining Russian rye grass on the weekend. At the present time there is no report on how well the crop turned out. The hot drying weather of the past ten days has brought the crops along well and the parts of the district that received the extra showers are showing it now although all crops look good. Hay is in progress and the crop is short of other seasons. Gardens are now yielding the results of all that hoeing and weed pulling; some have even sneaked below the surface of the potato row and found enough potatoes to make the family wish for more. The gardens however are showing the result of the dry spell and for those who can't water, a good shower would be most welcome.

Mrs. Bartsch went to Elnora on Saturday and was accompanied by her mother who will spend the remainder of her vacation visiting friends and relatives there before returning to her home in Kelowna, B.C.

Mr. and Mrs. Ken Vooyes have returned from their honeymoon, and have taken up residence in a trailer in the yard of the groom's parents.

Tea was served by the girls of the Mossleigh Student's Union.

Great Research Centre

The Pulp and Paper Research Institute of Canada is recognized as one of the chief centres of world knowledge on wood, on pulp and on paper.

And now Lord, what wait I for?
—Psalms 39:7
We look for the Saviour, the Lord Jesus Christ.

—Philippians 3:20
Henry Moorhouse once said to a dying saint, "I am going to read you the sweetest verse in the New Testament." Then he read, "In my Father's house are many mansions, if it were not so I would have told you, I go to prepare a place for you." The dying saint looked up and said, "That is not the sweetest verse in the New Testament. Read the next one to it." He read, "If I go and prepare a place for you, I will come again and receive you unto myself." To her the sweetest thought was the personal return of Christ, rather than the many mansions.

WEDDING ANNIVERSARY

— Everyone Welcome —

by
Frances Barton
of GENERAL FOODS KITCHENS

Around here, you're lucky enough
to have a local crop of Saskatoon
berries—a fruit that doesn't grow
in many parts of Canada. Here's
my recipe for making these un-
usual berries into an unusually
delicious jam!

SASKATOON JAM
4½ cups prepared fruit (about 1½
qts. ripe Saskatoon berries)
2 tablespoons lemon juice
(1 lemon)

7 cups (3 lbs.) sugar
1 bottle Certo fruit pectin

Prepare the fruit first. Crush
thoroughly about 1½ qts. fully
ripe Saskatoon berries. Measure
4½ cups into a very large sauce-
pan. Squeeze juice from 1 lemon
and measure 2 tablespoons into
pan with berries. Heat gently
until juice starts to flow. Simmer
covered for 15 minutes.

Next, make your jam. Add sugar
to fruit in saucepan and mix well.
Place over high heat, bring to a
full rolling boil. Boil hard 1 minute,
stirring constantly. Remove from
heat, stir in Certo at once. Skim
off foam with metal spoon. Stir
and skim for 5 minutes to cool
slightly, and to prevent floating
fruit. Ladle into glasses. Cover
at once with ¼ inch hot paraffin.
Makes about 12 medium glasses.

Just a few words of explanation
about pectin. This is simply the
jelling substance found in all fruits
in varying amounts. Certo is this
pectin, extracted from fruits rich in
this natural jelling substance,
then refined, concentrated and per-
formance-controlled. No wonder
your jam, jelly and marmalade
always set perfectly when you use
Certo and the tested Certo recipes.

Preserving Pointers. Do not set
hot jars from the canner in a
draft or on a cold wet surface.
This sudden temperature change
may cause them to burst. Set
them on a folded cloth or board
instead. Never attempt to re-
process canned foods that have
just begun to spoil.

If you ever run into a problem while
making your jam and jelly, be sure
to let me know, and I'll try to help.
Be with you again soon, so watch
for my next column.
